❑ Office365/ AAD

- Required on Windows 10 v.1909 or later.

- Required Azure license for AAD

Administrator

Azure(office365)

Detailed description

No additional setup required (Administrator)

- User can register security key to the office365 account and can use it for authentication.

Administrator

AAD

Detailed description

Azure portal

Sign in to the Azure portal (<https://portal.azure.com>)

Browse to **Security > Authentication Methods > Policies**

The image shows a sequence of three screenshots illustrating the navigation path in the Azure portal. The first screenshot is the 'Welcome to Azure!' page, with a red box highlighting the 'Manage Azure Active Directory' link. A yellow arrow points to the second screenshot, which shows the 'Security' menu in the left-hand navigation pane, also highlighted with a red box. Another yellow arrow points to the third screenshot, which shows the 'Authentication methods' link in the 'Protect' section of the right-hand navigation pane, highlighted with a red box. The right-hand navigation pane also shows other sections like 'Manage' and 'Report'.

Protect

- Conditional Access
- Identity Protection
- Security Center
- Verified ID

Manage

- Identity Secure Score
- Named locations
- Authentication methods**
- Multifactor authentication
- Certificate authorities

Report

- Risky users
- Risky workload identities
- Risky sign-ins

Azure portal

Turn on **Enable** in the FIDO2 security key settings menu.

The image displays three overlapping screenshots of the Microsoft Azure portal, illustrating the steps to enable FIDO2 security keys.

Left Screenshot: Shows the 'Authentication methods | Policies' page. The 'FIDO2 security key' is highlighted in the list of authentication methods.

Middle Screenshot: Shows the 'FIDO2 security key settings' page. The 'Enable and Target' tab is selected, and the 'Enable' toggle switch is turned on (indicated by a red box and a yellow arrow).

Right Screenshot: Shows the 'FIDO2 security key settings' page with the 'Configure' tab selected. It displays various configuration options, including 'Allow self-service set up', 'Enforce attestation', 'KEY RESTRICTION POLICY', and 'Restrict specific keys'.

Bottom Right Text: More detailed configuration menu

A solid green rectangular box with the word "User" written in white text inside it.

User

How to setup & use the Security Key
